Drawings

Figures 21-36 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest "the lever member is rotated around a first axis by engaging the first engaging portion and the first engaged portion with each other, and in the middle of rotation, the lever member is rotated around a second axis by engaging the second engaging portion and the second engaged portion with each other" in combination with the remaining claim elements as set forth in claims 1-12.

The prior art does not disclose or suggest "the driving force transmission member starts charging when the distance between the rotation center and the point of contact with the first driving lever is greater than the distance between the rotation center and the point of contact with the second driving lever and is set through switching of the rotation center at some midpoint so that the distance between the rotation center and the point of contact with the second driving lever is greater than the distance between the rotation
